What Is a Bottle Rocket?

A bottle rocket is a small model rocket that is typically made from a plastic bottle, such as a soda bottle, which uses pressurized air or water to propel itself into the air. It is a popular science activity because it demonstrates the principles of Newton's third law of motion: for every action, there is an equal and opposite reaction.

Key Scientific Concepts

Before starting the project, it's helpful for students to understand some fundamental concepts:

- **Air Pressure:** How trapped air can exert force when released.
- **Thrust:** The force that propels the rocket upward.
- **Gravity:** The force that pulls the rocket back to the ground.
- **Drag:** Resistance caused by air pushing against the rocket as it moves.

Knowing these concepts helps students predict and analyze how their rockets will perform and encourages scientific thinking.

Materials Needed for a Bottle Rocket

Creating a bottle rocket requires simple, readily available materials. Here is a comprehensive list:

- **Plastic Bottle:** 1 or 2-liter soda bottle (empty and clean)
- **Cork or Rubber Stopper:** To seal the bottle opening
- **Bike Pump with Needle Adapter:** For pressurizing the bottle
- **Water:** About one-third of the bottle's volume
- **Cardboard or Paper:** For fins and nose cone

Step 4: Seal the Bottle

- Insert the cork or rubber stopper into the bottle opening. Make sure it fits tightly to withstand pressure.

Step 5: Attach the Pump

- Insert the needle adapter of the bike pump through the cork or stopper, ensuring a tight seal.
- The pump will pressurize the air inside the bottle.

Step 6: Launch the Rocket

- Find a clear, open space outdoors for safety.
- Place the bottle upside down on a launch pad or stable surface.
- Pump air into the bottle slowly, watching for the pressure to build.
- When ready, release the stopper or carefully remove the pump nozzle to allow the water and air to expel, propelling the rocket upward.

Safety Tips for a Successful Launch

Safety is critical when working with pressurized containers and launching rockets. Keep these tips in mind:

- Always wear safety goggles during pressurization and launch.
