Kielhofner advocates for viewing occupation not merely as activity but as a vehicle for change. Her studies highlight how engagement in meaningful activities can:

- Promote physical and mental health.
- Foster social participation.
- Support psychological resilience.

Her research underscores that occupation is both a means and an end in therapeutic interventions.

3. The Person-Environment-Occupation (PEO) Model

Building on her theoretical frameworks, Kielhofner emphasizes the dynamic interplay between the person, environment, and occupation. Her investigations explore how modifications in any component can facilitate occupational performance and well-being.

4. Evidence-Based Practice and Research Methodology

Kielhofner's research underscores the importance of integrating empirical evidence with clinical expertise and client preferences. She advocates for rigorous research designs, including qualitative and quantitative methods, to build a comprehensive evidence base for occupational therapy interventions.
